## BOOK SYNOPSIS

"Seeing comes before words. The child looks and recognizes before it can speak. "But there is also another sense in which seeing comes before words. It is seeing which establishes our place in the surrounding world; we explain that world with words, but word can never undo the fact that we are surrounded by it. The relation between what we see and what we know is never settled." John Bergers Ways of Seeing is one of the most stimulating and the most influential books on art in any language. First published in 1972, it was based on the BBC television series about which the (London) Sunday Times critic commented: "This is an eye-opener in more ways than one: by concentrating on how we look at paintings . . . he will almost certainly change the way you look at pictures." By now he has. "Berger has the ability to cut right through the mystification of the professional art critics . . . He is a liberator of images: and once we have allowed the paintings to work on us directly, we are in a much better position to make a meaningful evaluation" -Peter Fuller, Arts Review "The influence of the series and the book . . . was enormous . . . It opened up for general attention to areas of cultural study that are now commonplace" -Geoff Dyer in Ways of Telling
